

Our circular no. 01/17 EXP
Date 12/06/2017
Object **CPR certified cables**

Dear costumers,

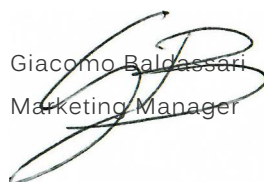

Trying to anticipate and satisfy your needs and not to create any discomfort about the important change that the cable industry is preparing to face, we took on significant efforts and investments to ensure that the products included in the CPR application areas are in line with the new regulations.

All this has allowed Specialcavi Baldassari to obtain the first Certificates of Assessment and Verification of the Constancy of the Performance already in October 2016 and to present itself at the predefined deadline with an offer, expanding, made up of both Italian cables and export cables for a total of about 300 designations compliant with new regulation.

Regarding the availability of technical documentation, on our website are already available updated datasheets of some of most important export cables such as YSLY, LiYY, YSLCY, LiYCY, LiYCY-TP, HSLH, LiHH, HSLCH, LiHCH, LiHCH-TP, etc.

In the coming weeks we will continue uploading to complete the publication of our product portfolio. For any further information or request we invite you to contact our sales office or our authorized representatives who will be happy to provide the necessary support.

Best regards,

Giacomo Baldassari
Marketing Manager
