

Our circular no. 02/17 EXP
Date 12/06/2017
Object **DoP Availability**

Dear costumers,

The DoPs about our cables will be made available in electronic format or, for those who had need, on paper. DoPs in electronic format will find a steady availability on our website.

For most popular cables you can download the respective DoP directly form the product fiche (even from the thumbnail) as can be see by visiting this link

<http://www.specialcavibaldassari.it/en/prodotti/export/all>

However, since:

- Some of the occasionally required products will hardly be included in the catalogue, despite their actual production and availability
- A cable currently inserted in the catalogue may become obsolete in the future and no longer be produced
- The availability and accessibility of DoP must be guaranteed for a period of at least 10 years from the time the construction product is placed on the market

We have also decided to create a specific area on our website dedicated exclusively to DoP researching

<http://www.specialcavibaldassari.it/en/dop>

In this area you will find not only the DoPs of ALL the cables in production at the time of launching the search, but also the historian of those connected to cables for which placing on the market has been stopped from less than 10 years.

The publication of the documentation in question is nearing completion and will be finished no later than 1 July 2017.

In the meantime, if becomes necessary to have a Declaration not yet uploaded to the site, our operators will be able to support you in the best way.

Best regards,

Giacomo Baldassari
Marketing Manager
